

SETAC OHIO VALLEY CHAPTER MEETING

April 20, 2018 - Ohio State University Museum of Biological Diversity

After a couple of years hiatus we are excited to announce a meeting of the Ohio Valley Chapter of the Society for Environmental Toxicology and Chemistry (SETAC) in Columbus, OH. With our partners from the Society for Risk Analysis Ecological Risk Assessment Specialty Group we will focus on recent innovations that have broad toxicological and risk assessment implications. This joint regional meeting will feature plenary sessions, student presentations, and a poster session. Student poster and presentation competitions will be held with travel awards for the winners. The theme of the meeting is:

New Tools & Technologies: Human Health and Ecological Risk Assessment

As new tools and technologies for evaluating and addressing environmental toxicology, risk, and health problems are developed, regulators, researchers and practitioners must determine how to integrate the new tools and technologies into current practices. New tools need to be specific, accurate, and cost effective. Predictions based on new tools must be correlated with established methods for toxicological evaluation and risk prediction. New tools can come with their own risks that need to be understood and characterized.

Registration and Meeting Info

Registration - \$50 for regular members, \$20 for recent graduate members, \$10 for student members. OVC membership dues are \$15 for regular members and \$10-15 for students and recent graduates. Undergraduate students may attend for free. Registration includes lunch and coffee breaks. The museum is located near the main OSU campus and hourly parking is available on-site at \$2/h. Exhibitors are welcome. For more information please visit the Ohio Valley Chapter website:
